

Mission Control (MC): Every one of us has a line in a verse of a song called Universe

EMERGE

We are alone when we enter the earth
We emerge
From above you see the morning light
You are alive
Here you must stay while you can
Try to understand
We are here as a witness to it all
A miracle

AQUAMARINE

Spinning on an axis
Toward eternity
Dinosaurs rule the land
Mermaids swim the sea

Aquamarine a world of blue and green
From one to the other extreme
And everything in between aquamarine

I came upon a gemstone
Held it close and dear
Fell into a kaleidoscope
Of hopes and dreams and fear

Aquamarine a jewel of blue and green
With mysterious properties
In which to believe aquamarine

Hurling around the sun
Each and every year
Making the same mistakes
We talk but we don't hear

Aquamarine a world of blue and green
Aquamarine learn from history
Rinse and repeat
Aquamarine a world of blue and green

A beautiful sight unseen
Forever in aquamarine

(MC): Pre-launch checks complete Pilot 1, system Green ... T minus 5 minutes ... T minus 5 minutes

ROCKET SHIP

Do you believe in miracles
Like I do
Do you believe in me
Like I believe in you
Then come with there's much to see
As we take a trip on a rocket ship

If every day is biblical
Big and true
If you believe in miracles
It's not so hard to do

Come with me to discovery
Through time we slip
Aboard a rocket ship

Chasing a shooting star
Passing Venus and onto Mars
Defying gravity in my wildest dreams

Do you believe in miracles
Like I do
Do you believe in me
Like I believe in you
Come with me through the mystery
As we take a trip

Aboard a rocket ship
Aboard a rocket ship
Aboard a rocket ship

TAKING FLIGHT IN ORBIT

(Pilot 1): Mission Control, pre-flight looking good

(MC): Roger that Pilot 1. Engine Ignition initiated ... go for launch

(8 ... 7... 6 ...)

Counting down building up inside of me

Calculate a best-known trajectory

Breaking free you feel it

Taking flight in orbit

Running to the thermosphere

The emptiness of space so clear

In harmony

With gravity

Taking flight in orbit

Taking flight in orbit

Round and round humanity establishing stability

Five times hypersonic

On a path in orbit

Taking flight in orbit

Taking flight in orbit

(5.. 4 .. 3 ...)

Counting down building up inside of me

Calculate a best known trajectory

Breaking free you feel it

Taking flight in orbit

Taking flight in orbit

Taking flight in orbit

(Pilot 1): I tell you what, it is so beautiful up here

(MC): I can only imagine Pilot 1. Continuing to monitor flight profile ... all systems normal.

TURBULENCE

(Pilot 1): I tell you, the ride is getting a little bumpy up here Mission Control

(MC): Roger that Pilot 1. Radar shows more turbulence along current path; consider a heading adjustment.

All your life
You've been fortunate
To be on the side of providence
Well good for you
Are you ready for round two
Put on your best defense
And ride the turbulence

It will take you round and round
It will shake you to the ground
Turbulence, turbulence, turbulence

It'll send you into a tumble
You may never recover
From turbulence
Watch out for turbulence
Watch out for turbulence
Watch out for turbulence
Turbulence

(Pilot 1): Seems to be straightening out now

(MC): That's good to hear Pilot 1, do you know where you are?

Do you know where you are?

HOURGLASS OF TIME

Down I go pushed from behind
Falling through the hourglass of time
So fast it goes to the end of the line
To the bottom of the hourglass of time

Is there someone to talk to
In my hour of need
Who I can look up to when I'm on my knees

One who understands me when I'm feeling blue
So I sift through sand to find ... someone like you

The thought of you is running through my mind
Falling through the hourglass of time

NOSEDIVE

(Pilot 1): Mission Control, do you mind if I call you by your first name?

(MC): No not at all

(Pilot 1): What is your first name?

(MC): My first name is Evelyn, but you can call me Eve

Pilot 1, do you read?

*Pilot 1, do you read? Pilot 1? ... Mission Control ... Pilot 1? ... Mission Control ... Pilot 1? ...
Mission Control*

Caught in a nosedive flashing before my eyes in a nosedive I left it all behind

Pilot 1? Do you read? Pilot 1? Do you read?

Caught in a nosedive chaos rules my mind mission control I'm losing all control

Pilot 1? Remember your training. Pilot 1? Remember your training

Mission Control *Pilot 1?* Mission Control

Caught in a nosedive flashing before my eyes in a nosedive and I'm feeling fine

I wish you could see what I see out here, Eve.

SATURN

Dim is the sunlight on an alien flight
Through dark matter
Pale is the blue dot
As seen from Jupiter's spot
Ice and rock scatter
From the rings of Saturn

Moonscape inviting on the lakes of Titan
Methane rain pitter patter
Space probes passing by
Watch as I fly in concentric patterns
Between the rings of Saturn
Saturn

Turn like a record round
Playing an eerie sound
Wispy voices chatter
Planets and planetoids
Take us into the void
We can be happy together

Circling skyward higher and higher
Into forever together
Beyond the rings of Saturn
Saturn

(MC): Pilot 1, we're losing your signal

(Pilot 1): I dunno, coming through that void, my instrumentation seems to be a little off. I don't even know where I'm at right now. Nothing seems familiar.

(MC): We're not receiving your signal. We're working on this now Pilot 1.

LIAR'S DICE

Fool me once fool me twice
In a game of liar's dice
Shake the cup and let it roll
Off we go

Play a game of liar's dice
The solution hides in plain sight
Fool me once fool me twice
Liars dice

If I am to believe
You're trying you deceive
When stakes ... are ...so high
If we leave it to chance
Will we ever dance
Roll the dice
Fool me once fool me twice
In a game of liar's dice

We are co-pilots to the stars
Together we've come so far
Drifting in space
You're my universe
For better or for worse
Give it to me straight
The hour is late
I don't wanna play anymore, I don't play this game anymore
I don't wanna play

Fool me once fool me twice
Play a game of liar's dice

(MC): Remember your training Pilot 1

(Pilot 1): I really wish you were out here with me right now, with me right now

CO PILOT

Caught in a nosedive
Flying blind
All my instruments are rendered useless
There's nothing I can do
I need you to be my

Co-pilot to see me through
My co-pilot to keep the navigation true
When the flight plan says it's time to land
Set me down safely on the ground

We've survived through the hourglass of time
Cosmic chaos, micrometeoroids
Drifting through an endless void
Answer the call to stop this downward spiral

I need my co-pilot to see us through
I need my co-pilot to keep the navigation true
When the flight plan says it's time to land
Set us down safely on the ground

(MC): Check your Control Panel, Pilot 1. We have sent safety protocols

You know it's hard traveling the stars
When all your instruments
Are rendered useless
And there's nothing you can do

Let me be your co-pilot to see you through
Your co-pilot to keep the navigation true
When the flight plan says it's time to land
I'll set us down safely on the ground
I'll set us down safely on the ground

(MC): Head towards the light Pilot 1, towards the light.

INTO THE LIGHT

Some people don't understand
When you got your head in the sand
You see what you want to see
Nightmare instead of a dream

When you wear someone else's shoes (Out of the dark)
You do something you'd never do (ness of the night)
Even if you don't agree (Out of the dark)
Some part of you begins to believe

Out of the dark ...
Ness the night
Into the light

In the beginning of the end (Into the light)
Your enemy becomes a friend (Into the light)
From the darkness of the night (Into the light)
Comes a light that shines so bright

Out of the dark
Ness the night
Comes a light that shines so bright

Into the light , into the light

(Instrumental) (Out of the dark)
(ness of the night)
(Out of the dark ... ness of the night)

Days come and go so fast (Into the light)
How can we make it last (Into the light)
Don't let things get in the way (Into the light)
Be thankful for each and ever day

Out of the dark
Ness of the night
Out of the darkness and
Into the light

(Pilot 1): I must have blacked out, I was lost in a dream.

(MC): Roger that

IMPOSSIBLE DREAM

You only see what you want to see
You only hear what you want to hear
Turn who you are meant to be
Into a reality

You only feel what you want to feel
It's only real if you make it real
The time is now to express yourself
It's your life to make and nobody else

If you're willing to take a chance
What you're hoping for is well within your grasp
When you choose to take a stance
You will get there at long last

But you better be prepared for all that is to come
For it is to come
Because it's waiting for you
In your impossible dream

Who would expect to believe that this could happen so fast
There must be a way to make this feeling last
Open the door and see all the possibilities
If you're ready to face the truth
Your impossible dream will be waiting

Leave your troubles behind and
Open the door to your impossible dream

(Pilot 1): I feel so at peace out here.

(MC): Pilot 1, do you read?

(Pilot 1): Evelyn, I don't know if you're getting this, but let everyone know I'm not coming back)

(MC): Pilot 1, we're losing your signal. Losing your signal. Where are you Pilot 1?

SPACE AND TIME

Sometimes you don't know where the answers lie
And the further you go the more you wonder why

It's not over now this isn't goodbye
We'll meet again someday somewhere

In space and time, in space and time
Space and time

In the moment when you must
Find your own way
You never are alone we all lay

In the cradle rocking on the edge
Of the milky way
Take comfort in the strange found between

Space and time
Between space and time
Space and time

When you don't know what's real
And what's in your mind
That's where we will meet someday

In space and time
Space and time
Space and time

Space and time (Somewhere in space and time)
Space and time (Somewhere in space and time)
It's not over now, this isn't goodbye

(MC): Pilot 1 do you read? Do you read? Pilot 1 ... Godspeed.

UNIVERSE

Flickering, brightly shining
It can be spell binding
Watching lights shoot across the sky

I am the universe, you are the universe
Traveling among the stars
Never knowing who we are
So we search across the universe

Living among the orbs together
They could go on like this forever
Finding a home inside the Milky Way

She is his universe, he is her universe
Bound by each other's gravity
For all eternity
For better or for worse in their own universe

Nah nah nah nah nah nah nah nah
Nah nah nah nah nah nah nah nah

Every constellation captures imagination
Telling stories of our lives
We are the universe
We are the universe
Rising up from the dust
Every one of us
Has a line in a verse of a song called Universe

We are the universe
For better or for worse
We are the universe

(MC): Pilot 1, I love you.

We hope you enjoyed tonight's Cosmic Journey, and that you go away remembering you have a line in a verse of a song called Universe.

Hold on, I think I hear something. I'm picking up a signal Pilot 1. Pilot 1, is that you? Is it you?

I CAN'T FLY TRUE

Requesting clearance for my return
It was worth the trip for what I've learned
Without you I don't know what I'd do
There's no reason just no meaning
Without you I don't know what I'd do
I can't fly true without you

We go looking for what is not instead of taking what we got
Without you I don't know what I'd do
There's no reason just no meaning
Without you I don't know what I'd do
I can't fly true without you

Without you I can't fly true
I don't know what I'd do there's no reason
Without you I don't know what I'd do
I can't fly true without you

LOOK UP TO THE STARS

Look up to the stars and see who you are
Look up to the stars and be who you are
Look up to the stars Look up to the stars
No matter what you do
Keep the navigation true
Stay true to who you are
And look up to the stars
And be who you are ... and look up to the stars

For better or for worse, we are the universe
For better or for worse (look up to the stars) we are the universe (and see who you are)
For better or for worse (look up to the stars) we are the universe (and see who you are)
For better or for worse (look up to the stars) we are the universe (and see who you are)
For better or for worse (look up to the stars) we are the universe (and see who you are)

No matter what you do
Keep the navigation true
Stay true to who you are
and look up to the stars ... and be who you are ... be who you are ... and look up to the stars
